Assistant Professor in Family Medicine and Community  
Health, University of Miami, Miami, Florida

**Special thanks to the American College of Obstetrics and  
Gynecology for their Educational Expertise**

## Program Objectives

### Smoking and Pregnancy

#### Goal:

To train healthcare professionals on the Implementation of successful smoking cessation strategies during pregnancy.

#### Objectives:

- Understand risk factors and types of disease associated with smoking and pregnancy.
- To provide training on smoking cessation intervention methods.
- Identify progress and address obstacles in treatment.
- Formulate an approach for long term adherence.

---

Healthcare providers have long struggled to overcome the adverse effects caused by the use of tobacco during pregnancy. Some 20 percent of low birth weight births, eight percent of pre-term deliveries, and five percent of all perinatal deaths are linked to smoking during pregnancy, making smoking the most important modifiable cause of poor pregnancy outcome.

## Program Date and Site

March 29, 2007

On Line Registration: 11:45 AM

Program Begins: 12:00pm - 1:30pm

As a participant, you will listen to the entire presentation over the phone. At the same time, if you also have access to the Internet, you can view the slide presentation live on our website.
